

WELCOME TO

First newsletter

AutoMOVET is on the way. The seven partners are at the moment working hard on developing

a competence grid that can be used by other automotive departments in Europe - a tool for mobility and comparison of educations - in short a go for an ECVET-system for the automotive VET-education in Europe.

The project had a super start at the kick-off meeting in Denmark, where all partners worked hard simply to create an overview of their own national automotive programmes. It is not easy to compare educational systems, levels and learning goals. So, the first step was to create an overview of the final com-

petence goals of Automotive VET-educations in the six partner countries and compare! Then agree on the similarities!! The next step was to compare with reference to the EQF (European Qualification Framework) and NQF (the National Qualification Framework). So far so good.

New Modules for mobility

Six new automotive modules will be developed as a result of this project. Six partner countries will develop and offer one international automotive module, each with an approximate length of two weeks. The AutoMOVET partners have chosen a specific approach, which means that each country develops and offers an automotive module in an area where they have something unique and special to offer European students.

Web Module Calendar

The modules will be advertised in a joint calendar at a set date, so that students

and teachers from other countries can pick and choose from the different modules in the calendar. The AutoMOVET modules will also be advertised in the calendar of an existing network at www.automobility-in.eu. Modules will, obviously, be described with reference to the AutoMOVET competence grid. *The six new modules will be published in the next project newsletter.*

Facts about AutoMOVET

The project aims to eliminate some of the challenges related to mobility for VET students and increase mobility. With inspiration from the LdV-projects MOVET I and MOVET II AutoMOVET will develop

- An automotive competence matrix and taxonomy table.
- One module per partner
- Memorandum of understanding and a format for learning agreement
- "Mobility process guide"
- Final conference

News

> **May - 2014**
AutoMOVET meeting in Kaunas
The AutoMOVET project group meets in Kaunas Lithuania 13. And 14. May to continue working with an ECVET system for the automotive education.

March - 2014

> **Students' mobilities start**

> **Feb. 10 - 2014**
AutoMOVET meeting in Gouda.
The project group is working on a draft for a full competence grid for the automotive vocational programme.
